SUMMARY

Backend Developer with hands-on experience building scalable RESTful APIs using Node.js and Express.js, with strong expertise in database design using MongoDB and PostgreSQL. Experienced in authentication, authorization, payment gateway integration, and cloud deployment on AWS. Solid understanding of full-stack workflows with React, enabling effective collaboration across frontend and backend systems.

WORK EXPERIENCE & PROJECTS

Chronara – E-commerce Platform for Watches

Aug2024 - Present

- Designed and developed RESTful backend APIs using Node.js and Express.js for product management, user authentication, cart, orders, and checkout workflows.
- Implemented secure authentication and authorization using Passport.js and JWT, including role-based access for users and admins.
- Designed and optimized MongoDB schemas for users, products, orders, and payments, ensuring efficient data retrieval and scalability.
- Integrated a secure payment gateway to handle transactions, order confirmation, and payment status tracking.
- Developed admin-side APIs for order management, sales tracking, and generating basic sales reports.
- Deployed backend services on AWS, configured environment variables, and ensured secure API access.
- Implemented error handling, input validation, and API response standardization to improve backend reliability.

Student Management System

- Built a backend-driven CRUD application using Node.js and Express.js for managing students, staff, and records.
- Developed REST APIs for creating, updating, deleting, and retrieving student data with proper validation.
- Designed database models and relationships to ensure structured and consistent data storage.
- Implemented authentication and protected routes to restrict access based on user roles.
- Focused on efficient data handling and API performance optimization.

To-Do List Application (React-based)

- Built a responsive To-Do List application using React.
 - Implemented task creation, update, and deletion using React Hooks.
 - Designed reusable components for maintainable and clean frontend architecture.
 - Focused on user-friendly UI and component-level state management.
-

EDUCATION

Aug 2024 - present

Coding Bootcamp (MERN Stack Development)

Brototype,Calicut,Kerala

- Gained hands-on experience in MERN stack (MongoDB, Express.js, React, Node.js)
- Developed two industry-level projects applying full-stack development best practices
- Strengthened skills in front-end, back-end, and database integration

Bachelor of Science in Computer Science

Jun 2017 - Mar2020

KAHM Unity Women's College Malappuram,Kerala

- First Class in degree examination
- Final Year Project: Gate Pass Management System – Developed both a mobile application and website to manage gate passes for students and staff.

SKILLS

- **Programming & Development:** JavaScript (ES6+), TypeScript, HTML5, CSS3,OOP
- **Frameworks & Libraries:** React, Node.js, Express.js, Bootstrap, Tailwind CSS, Redux
- **Databases & Data:** MongoDB, PostgreSQL, SQL (queries, data validation)
- **APIs & Integrations:** REST APIs, API testing with Postman, basic integration troubleshooting
- **Cloud & Tools:** AWS, Git/GitHub, Figma
- **Application Support:** Issue troubleshooting, root cause analysis, ticket handling, user support, documentation, UAT support
- **Reporting & Productivity:** Basic Excel, data extracts and validation
- **Professional Skills:** Clear communication, attention to detail, ownership of tasks, teamwork, problem-solving, logical thinking
